## COATS PROGRAM - GUIDE FOR PAYMENT CLAIMS FOR 2022-2023

*Adult Non-Residential Services (In Scope)*  
*Aboriginal, Youth and other Non-Residential Services (Out of Scope)*  
*Residential Services (Out of Scope -DTAU)*

### GENERAL SUMMARY: In Scope, Out of Scope and Out of Scope -DTAU

This guide provides information on the prices and products for payment claims through COATS for the provision of Adult Non – Residential Services (In scope), First Nations, Youth and Other non-residential treatment services (out of scope) and Residential Services (Out of Scope-DTAU) effective from 1 July 2022.

The Department of Health (DH) has adopted Activity Based Funding (ABF) for all adult AOD non-residential treatment services (In Scope) and Residential Services (Out of Scope-DTAU) whereby service providers receive funding based on the number and types of services provided. In line with an ABF approach, a common funding unit is utilised; a Drug Treatment Activity Unit (DTAU). DTAUs allow relative prices to be compared and adjusted across AOD activities that use different combination of units. Product prices have been determined based on the 2022/23 funding guidelines by DH. As of 1 July 2022, one DTAU unit equates to **\$904.73** of funding. New prices are inclusive of non-attendance and after-hours capacity. **Where clients do not attend any required sessions outlined to constitute a payment for treatment, no claim for payment can be made for all adult AOD non-residential treatment services (In Scope) and Residential Services (Out of Scope-DTAU).**

#### Treatment Completion Advice Payment Forms

Treatment agencies must complete Treatment Completion Advice (TCA) documents in the Penelope portal. Completion of TCAs enable ACSO to process payment to treatment agencies according to the activity provided and keeps the Penelope case list up to date. The TCA provides the option for partial or full payment, depending on the number of events per course of treatment (see Table 1, 2 & 3 for more details). COATS will calculate the appropriate rate for the course of treatment. Please note that the maximum price paid for an episode of care cannot exceed the full payment amount listed in Table 1, 2 and 3 (this includes any non-attendance payments).

The Clinical TCA should be completed within **two weeks of cessation of treatment** to ensure that Justice Case Managers have the most up to date information to assist with case management and court reports. A TCA event will remain open for **six months from the date of treatment commencement**. Payment will not be made to those TCAs which remain outstanding after this time, unless by exception (e.g. a deferral has been sought and the client is still engaged in the initial course of treatment beyond six months).

## COATS PROGRAM - GUIDE FOR PAYMENT CLAIMS FOR 2022-2023

*Adult Non-Residential Services (In Scope)*  
*Aboriginal, Youth and other Non-Residential Services (Out of Scope)*  
*Residential Services (Out of Scope -DTAU)*

It is expected that all treatment agencies will provide the necessary level of care identified to meet the needs of individual clients. This means that some clients may require more or less treatment events than identified in Tables 1, 2 and 3. Service providers are expected to adjust the duration and intensity of the treatment response to meet the complexity of the client's presentation. The payment model has been designed to give providers the flexibility to respond to a spectrum of client needs.

A maximum of three 'no-shows' will be paid for all **First Nations, Youth and other non-Residential services (Out of Scope)**. Where clients do not attend all required sessions outlined to constitute full payment for treatment, an agency can claim up to three no-show payments of \$50.00 each in addition to the partial payment. **No-shows cannot be claimed in addition to full payment.** In instances where a forensic pre-payment or retainer is in place, activity, including assessments will be reconciled against this payment before fee for service is issued. Please note that the maximum price paid for an episode of care cannot exceed the full payment amount listed in Table 2 (this includes any non-attendance payments). Drug and Alcohol Assessments will not be brokered to **Adult Non-Residential Services** as these will be undertaken by Adult Non-Residential Assessment & Treatment providers.

Where an agency is providing Bridging Support to forensic clients for all **Residential Services (Out of Scope- DTAU)**, this is to be recorded against overall DTAU. A maximum of four (4) bridging support contacts are claimable per course of treatment through the same Clinical TCA.

### Treatment Extension and Variations

Treatment extensions or second episodes of care can be requested but will only be granted after a **maximum number of sessions/hours** for the relevant service type have been completed. A treatment variation can also be requested by treatment providers should a client's clinical requirements change significantly during the treatment episode.

To request a treatment extension or an additional treatment course, the treating clinician **must** consult with the client's Justice Case Manager for authorisation. Once this has been approved, the treating clinician **must** submit a TCA for the current course of treatment and request an additional course using the Extension form via the Penelope portal. This Extension form must include relevant information relating to the clinical need for an additional course of treatment. The client will not need to be re-assessed by COATS for a first extension request, however, any subsequent extensions may require a COATS re-assessment. This will be reviewed on a case-by-case basis.

Treatment can be varied for all **Out of Scope- DTAU services** in order to reclassify between a Standard and Extended treatment course should a client's clinical requirements change significantly during treatment, the treating clinician must consult with the client's Justice Case Manager for

## COATS PROGRAM - GUIDE FOR PAYMENT CLAIMS FOR 2022-2023

*Adult Non-Residential Services (In Scope)*  
*Aboriginal, Youth and other Non-Residential Services (Out of Scope)*  
*Residential Services (Out of Scope -DTAU)*

authorisation. Once this has been approved, the treating clinician will continue to use the same service file on Penelope for an extended course of treatment. A treatment extension request form via the Penelope portal is no longer required for **Out of Scope- DTAU** services. When a client is varied to extended, payment claimable is based on extended dollar amount **ONLY** (not standard plus extended).

Please note, in the instance where a client's Community Corrections, Youth Justice or Parole order has expired, or their engagement with a Court-based program, such as CISP or Credit Bail, has ceased, service providers will consult with the relevant Justice agency before approving treatment extension or variation requests. For Diversion clients, only one treatment extension request will be granted (equating to two courses of treatment).

Please note: Forensic referrals include any referrals authorised or directed through COATS and meeting the COATS forensic criteria (available on the COATS website). Referrals for clients classified as diversion include referrals to COATS through Victoria Police, Court-based programs and those ordered to attend treatment by Child Protection. **Agencies should submit referrals for registration of diversion clients no later than one month from date of first client contact.**

### Forensic Targets

All DH funded catchment-based intake providers have a target of **10% DTAU** utilisation for screening and intake of forensic clients. Where an agency is providing Intake and/or Bridging Support to forensic clients, this is to be recorded against overall DTAU. As these products will not be brokered by COATS, service providers are not required to submit TCAs.

All providers of non-residential treatment have a minimum target of **20% DTAU** utilisation for assessment and treatment of forensic clients. All providers of Residential Services (Out of scope -DTAU) treatment have a DTAU utilisation target for treatment of forensic clients. A range of agencies in high demand areas have been allocated additional DTAU in 2022/2023 for treatment of forensic clients. This funding is incorporated into the provider/consortia's overall DTAU. Once this combined target has been reached, agencies may be eligible for fee for service for any additional forensic referrals. Fee for Service will **not** be approved until ACSO receives endorsement from the catchment DH divisional office. As such, it is expected that agencies will have ongoing discussions with their divisional contact to discuss DTAU allocation and resourcing across the catchment prior to requesting Fee for Service.

## COATS PROGRAM - GUIDE FOR PAYMENT CLAIMS FOR 2022-2023

*Adult Non-Residential Services (In Scope)*  
*Aboriginal, Youth and other Non-Residential Services (Out of Scope)*  
*Residential Services (Out of Scope -DTAU)*

### Capacity Issues

To assist in managing demand issues at a local level, agencies **must** discuss any capacity issues with their regional DFFH office before requesting that referrals are put on hold for a particular location or period.

### Pricing

ACSO will apply pricing loadings as follows: Forensic client price loading of 15% and First Nations client price loading of 30%. If a client is an Aboriginal and/or Torres Strait Islander *and* a forensic client, the 30% loading only will apply. These loadings will be funded from within a provider's DTAU allocation and not as additional payments. In instances where a forensic pre-payment or retainer is in place, activity, including assessments will be reconciled against this payment before fee for service is issued.

Complexity will be determined through the administration of the common screening tool, which will be conducted as part of the intake and assessment function by either the catchment-based service or by ACSO COATS. Service providers will only receive the 'complex' price for those clients screened as complex through this process or who have submitted a variation should client's circumstances or presentation change during the course of treatment.

\*For the purposes of recording counselling, withdrawal treatment and CRC, an event refers to direct contact with the client including face to face, phone-based, family meeting or a care coordination meeting where the client is included. It does not include meetings without the client or carer present, they are considered indirect and not counted toward client contact

\*CRC cannot be claimed if no direct client contact was made regarding treatment, eg phone call to schedule an appointment but no treatment was discussed, or clinician leaving numerous messages, but client never made contact, did not pick up calls or return voicemails
